

CyberScout and Your Agency

Frankly speaking, protecting the identities and data privacy of your family, policyholders and agency staff is critically important.

We know this to be true with the growing number of credit card, online data and cyber security breaches that happen every day, and to nationally recognized names like Target, Home Depot, UPS, Wendy's and more, compromising the identities of millions.

As more consumers become susceptible to identity theft due to rapidly-changing technology and the sophistication of scams, our communication feeds have become oversaturated with tips for building stronger passwords, protecting your email, advice for monitoring your children's online activity and updates from social media applications regarding "new and improved" privacy features.

Rather than understanding how to best protect your personal and confidential information, it has only become more overwhelming.

Fortunately, [CyberScout](#) is a comprehensive tool that allows you to be on the offensive, rather than just the defensive, when it comes to protecting your identity. And, if you're in need of breach services, CyberScout is equipped to help. It is also provided **free of charge to all** Frankenmuth Insurance independent agency partners, your family, agency staff and policyholders.

Don't wait until you're a victim of fraud – get started by testing your know-how using the [ID Risk Compass](#), and see where you compare with other Americans taking the necessary steps to protect themselves and their families from identity theft.

To learn about other lines of defense, click [here](#). If you need to talk with a fraud specialist, call 1-800-234-4433.

Stay tuned to our Agency Blog throughout March for featured security tips and highlighted services each week from our CyberScout tip series. Feel free to also reach out to your Field Manager for questions.
