

Frankenmuth Insurance Improves Issuance Process for Commercial Lines

In our ongoing efforts to improve our systems and processes, Frankenmuth Insurance has made changes to help streamline issuing quotes for commercial lines policies.

Our system now provides a complete list of required items earlier in the quoting process to ensure all information is captured before issuance. These items are also now included on the Policy Subject to Issuance Report in the application, so you can quickly confirm information accuracy with your clients, prior to finalizing and issuing quotes.

We thank you for your partnership and welcome your feedback on this new enhancement. For questions, please contact your field manager, underwriter, or Automation Support at 800-234-1133, ext. 3000.
