

Frankenmuth Insurance Launches Improved Modifier Screen for iBIS Policy System

Thank you for continuing to provide valuable feedback that has allowed us to improve our new iBIS Policy System. On Monday, Nov. 12, we will be launching the newest enhancement to our system: a combined Modifier Screen for all commercial policy lines.

This enhancement efficiently combines Commercial Property, General Liability, Inland Marine, Crime and Umbrella into one screen (the Modifier Screen for Business Owners, Commercial Auto and Workers Compensation will remain the same). For added convenience, Modifier entry for credits and debits on existing commercial quotes will automatically be transferred to the new combined Modifier Screen.

We are confident this additional enhancement will improve your overall efficiency when writing commercial business with us. We continue to pursue system improvements that deliver an exceptional experience for our agency partners and appreciate your input on ways to improve that experience.

For any questions about these new iBIS Policy enhancements, please don't hesitate to contact Agency Services Support at (800) 234-1133 Ext. 3000.
