

Internet Explorer Browser Support!

Internet browser technology continues to evolve at a rapid pace. Microsoft Internet Explorer's most current browser is version 11 (IE11).

As a result, it is prudent to stay current on the browser version you use. This will allow your agency operation the latest browser security capabilities, processing efficiencies and improved user experience when accessing various web sites, including iBIS.

Please take a few minutes to look at the version of Microsoft Internet Explorer on your PC today. Simply click on the Tools icon or the Help option in the upper right side and select About Internet Explorer. A window will open to display the browser version installed on your PC. If you are not on at least version 10, it is time to upgrade for optimal browser performance and ability to access all options in iBIS.

If you have any questions, please don't hesitate to contact eBusiness Support at 1-800-234-1133 extension 3000.
