

Keep Business Owners Ahead of Losses with Our Safety Solutions

To keep policyholders' businesses running with ease we encourage you to learn about our loss control services and injury triage hotline. In addition to our great policies, we offer safety solutions that help businesses run smoothly so their owners can sleep soundly at night.

This year, we added injury triage to our loss control services. We've partnered with health services provider Medcor, to offer the complimentary service for workers compensation policyholders. This service gives supervisors and employees 24/7 access to trained health care professionals for non-life-threatening injuries by calling 833-833-1934.

Benefits of using injury triage include:

- Provides immediate care for an injured employee
- Readily determines the appropriate level of necessary care
- Helps keep employees working when only minor treatment is required
- Helps reduce claim expenses, ultimately lowering workers compensation insurance expense
- Eliminates the need to file a First Report of Injury
- No cost to policyholders

Within our loss control program, we offer access to loss control consultants who can:

- Identify hazards and perform loss analysis
- Evaluate existing safety programs
- Recommend ways to make the business safer
- Lead and support safety meetings

We also provide services and customized plans for policyholders' risk management needs, including:

- No-cost safety training with streaming online videos, PowerPoints, and quizzes
- Workplace assessments to identify job hazards
- Safety programs audits/reviews
- Development of safety behavior programs
- Safety committee development and support
- Development of risk management action plans and more

Should you have questions, please contact your field manager.
