

Frankenmuth Insurance Announces Workers' Compensation Rate Decrease in Michigan

At Frankenmuth Insurance, we recognize the significant value of workers' compensation business in your portfolio and ours, so we're taking further action to bolster mutual production.

Effective July 1, 2018, we are decreasing rates on the majority of our class codes. Overall, this translates into a rate decrease of just over 7% with individual classes varying based on their past performance and future opportunity.

We hope this aids our agency partners in generating new workers' comp opportunities, while helping to retain our valuable renewal business. Feel free to contact your commercial field manager or underwriter with any questions or comments.

Thanks again for your continued partnership and support.
