Frankenmuth Insurance Introduces Physician Panels

Frankenmuth Insurance is pleased to announce that we will be providing physician panels to workers compensation policyholders in Georgia, Tennessee, and Virginia, for all locations, beginning this month.

Physician panels will inform employees which physicians/providers they can visit for treatment of work-related illnesses and injuries. Making the information accessible for employees will help reduce claims costs while better assisting and directing medical and disability care for injured employees.

These panels will be sent to policyholders via email to print on-location or hard copies will be mailed. Policyholders should place the panels in conspicuous areas for employees to see.

If you have any questions, please contact your field manager.
